### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The claims as drafted now define patentably over the various prior art teachings of record. Specifically, Ohashi et al. shows third manifold spaces connected to a third set of tubes, but the third manifold spaces are provided with an inlet and outlet for fluid. Other references show leakage detecting spaces defined between first and second manifold spaces for first and second fluids, with weep holes for detecting leakage, but lack third tubes connected to these spaces disposed between the first and second sets of tubes of the heat exchanger (Krehl et al., for example, shows only a single solid member 11 disposed between the sets of tubes and communicating with the leakage detecting spaces 15).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (703) 308-1015. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Scherbel can be reached on (703) 308-1272. The
